Investment Objective

The Fund's investment objective is to achieve consistent absolute, risk-adjusted returns through diversification across multiple asset classes and strategies. The Fund will allocate its assets across a number of funds and managed accounts implementing a variety of investment strategies, which are managed by professional managers investing in countries predominantly, but not exclusively, contained in the MSCI All Country World Index. In addition, the Fund may invest in other securities, including derivatives, as part of its overall investment and hedging strategy and for the purposes of efficient portfolio management.

Cumulative Performance of \$1,000

Strategy Breakdown as at July 2010

Investment allocations may be changed or modified at any time without notice to you at the sole discretion of the Investment Manager.

Monthly Commentary

The Global Multi Strategy Fund lost 58bps during the month. July was a much stronger month for markets after a very tough period, with stocks rallying strongly throughout to leave major indices circa 7% higher on the month. Equities had sold off in May and June due primarily to European sovereign concerns. Hedge funds were de-risking over this period as correlations spiked, volatility increased and performance was soft, thus many managers therefore came into July with light books and consequently underperformed the major indices. For the Fund, the main negative contribution came from our directional managers, who found themselves on the wrong side of the swift reversion back to the "risk on" trade. It is not feasible for us to try to time the risk-on/risk-off trade, and as a result we have maintained focus on the themes that have been the core investment strategies for the past several months, which are designed to generate stable returns despite market volatility by focusing on liquidity and nimble trading.

Quantitative Analysis

Risk	Fund	HFRX	MSCI	Return	Fund	HFRX	MSCI
Sharpe Ratio	(0.08)	(0.56)	(0.36)	Average Annual Return	1.38	(3.16)	(7.91)
