

Investment objective and policy

The Fund aims to achieve long term capital appreciation and a reasonable level of income by investing principally in International companies. The Amity International Fund seeks to invest in a portfolio of companies which make a positive contribution to society and the environment through sustainable and socially responsible practices. The Fund seeks to avoid investment in certain areas such as companies which have a material involvement in alcohol, tobacco and weapon production, gambling and publication of violent or explicit materials.

Fund manager commentary - Rob Hepworth

Global markets were mixed in March as much of the optimism on US corporate earnings and GDP growth appears already priced in, and the short term effects of the European Central Bank LTROs (Long-Term Refinancing Operation) are beginning to diminish. Market participants focused increasingly on the prospects for more monetary stimulus in the US and Spain's ability to meet fiscal targets, resulting in volatility in treasury yields and rising peripheral Eurozone bond yields.

Equity markets are supported by ample liquidity and reasonable valuations, however the prospect of an economic slowdown remains, especially in Europe. Exposure to Asia has been increased through Standard Chartered, with some reallocation from European holdings. The fund maintains its overweight position in Asia Pacific equities, is underweight Western banks and holds high cash balances seeking to invest at attractive valuations in line with its long term strategy.
