

## Investment objective and policy

The Fund aims to achieve long term capital appreciation and a reasonable level of income by investing principally in International companies. The Amity International Fund seeks to invest in a portfolio of companies which make a positive contribution to society and the environment through sustainable and socially responsible practices. The Fund seeks to avoid investment in certain areas such as companies which have a material involvement in alcohol, tobacco and weapon production, gambling and publication of violent or explicit materials.

## Fund manager commentary - Rob Hepworth

Global equities rebounded in June following Spain's request for aid to support its banks, resolution of political drama in Greece and steps towards a European banking union taken at the EU summit, fuelling hopes that policymakers will accelerate their slow and incremental process of dealing with the crisis. Economic data has been weakening in the US with market participants debating whether the Fed will engage in QE3 ahead of November's presidential election.

Global central banks are easing policy in the face of economic slowdown and recession in Europe, however borrowing costs in the periphery remain high and a sustained reduction is needed to restore confidence in financial markets. Valuations in Europe and Asia remain low and investments have been made in European names such as Fortum and Sanofi. The Fund continues looking for opportunities at attractive valuations in line with its long term strategy.
