

Investment objective and policy

The Fund aims to achieve long term capital appreciation and a reasonable level of income by investing principally in International companies. The Amity International Fund seeks to invest in a portfolio of companies which make a positive contribution to society and the environment through sustainable and socially responsible practices. The Fund seeks to avoid investment in certain areas such as companies which have a material involvement in alcohol, tobacco and weapon production, gambling and publication of violent or explicit materials.

Fund manager commentary - Rob Hepworth

Equity markets in Europe and Asia outpaced their US counterpart in November as the conclusion of the nation's presidential election failed to abate investors' concerns surrounding the impending expiration of tax-cuts and federal spending programmes. European equities outperformed other major gauges as Eurozone finance ministers approved an additional aid package for Greece, providing the country access to further loans from the IMF and a greater timeframe in which to reach its budget targets. The agreement provides temporary breathing space for Greece, however until a sustainable resolution to the sovereign debt crisis in Europe is found, volatility in financial markets is likely to persist. Stock activity included a reduction in Carl Zeiss Meditec following strong performance whilst an investment was made in China Metal Recycling, a scrap metal recycling company based in China which was trading at a compelling valuation and offered a high dividend yield. The Fund continues to seek similar investment opportunities in attractively valued companies with sound balance sheets that are advantageously positioned in the face of an uncertain macroeconomic environment.
