## Risk / return ratio

Low  High

## Investment objective and policy

BL-Equities Europe invests in European equities with no restriction with regard to market capitalisation. The structure of this fund is not linked to a benchmark index, but results from the addition of individual investment opportunities. The fund aims to achieve long-term capital gains.

## Fund manager report

Three new investments were added to the portfolio. Technicas Reunidas is an international contractor specialising in the engineering, design and construction of industrial sites, primarily in the gas, oil and energy sectors. The group has become one of the leading global contractors in downstream oil sector infrastructure (including refineries and petrochemical plants) through the use of proprietary technologies and the expertise accumulated since 1959. Sulzer is a world-leading industrial group particularly in high-pressure pumps for the oil and paper sectors, and equipment and coating materials for the energy, aviation and automotive industry. Imtech is a technical services provider that designs, installs, monitors and maintains electrical, heating, ventilation, cooling, security and water systems in buildings, infrastructure, industrial sites and the shipbuilding industry. The manager has also taken advantage of attractive valuation levels to add to the fund's investments in Aalberts, Adidas, Akzo Nobel, CRH, Deutsche Boerse, Neopost, Sage, and SAP. These investments have been financed by the total sale of Vinci (normal valuation reached), Kaba (normal valuation reached) and Southern Cross Healthcare (fundamentals have deteriorated). Meanwhile, positions in BAT, Diageo, Reckitt Benckiser, SKF and Roche have been reduced.
