

Active Solar

Long-only fund on the worldwide solar sector

The fund is invested into listed stocks of companies mainly active in the solar photovoltaics industry. Thanks to an active management, the fund's objective is to offer investors the best exposure to this sector in order to benefit from its strong growth.

Bearing a high risk profile, the fund has very high expected returns. Investment horizon should be mid- to long-term.

Fund performance since 31.12.2013

Management comments

The strong growth of the solar market is being confirmed in 2021 with 190 GW of new installations expected (+26%) and should keep going in 2022 and 2023 with respectively 250 GW and 310 GW. COP26 could accelerate the growth that currently relies mainly on:

- ▶ China: Target of carbon neutrality by 2060 / target of reducing CO₂ emissions before 2030. China could install 80 GW per year until 2025.
- ▶ EU: Target of carbon neutrality by 2050 / target of reducing CO₂ emissions by 55% by 2030 / green hydrogen strategy. The EU could install at least 60 GW per year until 2030.
- ▶ USA: Target of carbon neutrality by 2050 / target of reducing CO₂ emissions by 50% by 2030 / power generation to be 100% renewable by 2035. The USA could quickly install ca. 50 GW per year.

The solar sector is definitely mature both on technology and industrial development. The best companies of the sector will massively increase their revenues and profit by 2025.
